ABOUT ME

Computer Systems Engineering graduate from Universidad Politécnica de Aguascalientes with hands-on experience building scalable web and mobile applications using JavaScript, Java, Python, and C#. Passionate about exploring new technologies, collaborating across teams, and crafting user-centered designs.

MY STACK AND TECHNOLOGIES

- **Frontend:** HTML/CSS (SASS), JavaScript/TypeScript, React, React Native, Next.js, Angular, Expo, Tailwind CSS, NativeWind, Material UI, Ant Design, Redux (Toolkit), Zustand, Vite, Jest, Prettier, ESLint.
- **Backend:** Node.js (Express, Nest), Java (Spring Boot, Spring Security), .NET, Strapi, RESTful APIs, Design Patterns, Python.
- **Databases:** MySQL, PostgreSQL, MongoDB (Mongoose).
- **DevOps & Cloud:** Webpack, Docker, CI/CD (GitHub Actions), AWS (EC2, S3, IAM), Nginx.
- **Other Tools:** WordPress, WooCommerce, Stripe, PayPal, Git/GitHub, VS Code, PgAdmin, DBeaver, Postman, Figma, Jira, Pandas, Tableau.

WORK EXPERIENCE

MIAA – Full Stack Developer (Jan 2025 – August 2025)

Led end-to-end delivery of multiple enterprise applications for notary services, HR management and surveys, serving 3+ departments of the company.

- **Notary System & PDF Certificates:** Designed and implemented a high-throughput Spring Boot REST API for water-debt queries and automated PDF certificate generation (iText, Spring Security, JWT), streamlining processes by 80%.
- **HR Platform Refactor & Reporting:** Refactored a legacy HR system to optimize attendance-incidents and schedule-management modules—boosting performance by 40%; integrated centralized error logging and built custom report generators with Python (Pandas).
- **Mobile Check-In App:** Migrated a React Native attendance tracker to TypeScript and Zustand (Expo), enhancing geolocation accuracy and component reuse, which reduced runtime errors by 30%. Deployed it on Google Play Store.
- **Responsive Survey & Analytics Platform:** Built a scalable survey SPA (React, Ant Design, Redux) with dynamic Formik forms, robust Spring Boot APIs, user authentication, email notifications, Excel export, and interactive dashboards.
- **Reusable UI Components & Auth Infrastructure:** Developed shared React components (Tailwind CSS, Formik) and standardized authentication flows, accelerating new feature delivery and maintaining by 25%.

Technologies: Spring Boot, Spring Security, JWT, MySQL, React, Redux, React Native, TypeScript, Zustand, Ant Design, Formik, Tailwind CSS, Python (Pandas), iText, Expo, Git.

Note: For more information about the projects, you can see my portfolio on <https://devsarrollos.com/ramses-meza>

DESIGNA – Software Developer (Apr 2022 – Dec 2024)

Developed and maintained educational platforms, websites, and data solutions, collaborating with UX/UI designers (Figma) and leveraging Webpack for optimized frontend builds and NGINX for efficient deployment, while owning CI/CD pipelines to ensure rapid, reliable delivery.

- **Causanatura Media Redesign:** Led full-stack migration from WordPress to React/Next.js and Strapi/PostgreSQL; automated content migration via Python scripts; integrated Amazon Translate for localization and AWS services (EC2, S3) for hosting and storage; added PayPal donations—boosting performance and donations by 30%
- **Course Management System:** Built MVC modules in .NET (Entity Framework) for student, instructor, course, and document catalogs; integrated AWS S3 for document storage; implemented end-to-end CRUD with robust validation.
- **Career Certification Platform (“Acuerdo 286”):** Refactored a tightly-coupled Node.js/Express codebase into a modular architecture. Deployed RESTful APIs with MongoDB (Mongoose); architected a React/Redux SPA (Ant Design, Formik) and configured CI/CD pipelines (Docker, GitHub Actions) on AWS EC2/S3.
- **Analytics Dashboard (EDUAL):** Performed ETL and data cleansing in Python (Pandas) and crafted interactive Tableau dashboards; enabled stakeholders to monitor survey results in real time, reducing report turnaround by 60%.

Technologies: .NET (Entity Framework), Python (Pandas), Node.js (Express), React, Next.js, Redux, Ant Design, Formik, Strapi, MongoDB, PostgreSQL, AWS (EC2, S3, Amazon Translate), Docker, GitHub Actions, Tableau, Tailwind CSS, Figma, Git.

INSEEL – Software Developer (Apr 2021 – Feb 2022)

Developed and customized high-traffic e-commerce platforms, ensuring brand consistency and seamless user experiences across desktop and mobile.

- **Tecnoimports E-commerce Site:** Adapted the design and theme of an existing WordPress site (inseel.com) to build a customized replica for Tecnoimports, maintaining visual consistency and improving usability.
- **Inseel Corporate Store:** Led end-to-end development and design of inseel.com, defining visual identity (colors, typography, branding), and implementing a WooCommerce store with product catalog, payment gateways, and inventory management.
- **Page Customizations & UX Enhancements:** Utilized Elementor to create and optimize key pages (homepage, product/service catalogs, “About Us”, contact page, navbar, footer), resulting in a more intuitive navigation flow and faster page load times.

Technologies: WordPress, WooCommerce, Elementor, PHP, PostgreSQL, CSS/HTML, Git.

Note: You can see the projects on <https://inseel.com/> and <https://tecnoimports.com/> , for more information see my portfolio on <https://devsarrollos.com/ramses-meza>

EDUCATION

Universidad Politécnica de Aguascalientes (2020 – 2024)

Degree in Computer Systems Engineering

- Final grade: 9.0/10
- Graduated with B2 English proficiency (TOEFL Writing)
- Selected for the DUAL Model—combined full-time studies with professional work in the tech sector
- Key Certifications:
 - CCNA 1: Introduction to Networks | Cisco (2021)
 - CCNA 2: Switching, Routing & Wireless Essentials | Cisco (2022)
 - Packet Tracer (PKT) | Cisco (2021)
 - Get Connected | Cisco (2021)

CTISS No. 155 “Josefa Ortiz de Domínguez” (2016 – 2020)

Programming Technician Diploma

- Java OOP applications development
- MySQL database design and management
- Android mobile app development (Android Studio)
- Web fundamentals: HTML, CSS, JavaScript
- Introduction to networking via Packet Tracer simulations

ONLINE COURSES

- **DevTalles (Spanish course platform)**
 - Git + GitHub: Version Control System from Scratch
 - React: From Zero to Expert (Hooks & MERN)
 - React Native Expo: Native iOS & Android Apps
 - Node.js: From Zero to Expert
 - REST Authentication with Clean Architecture
 - Zustand: State Management for React
 - Design Patterns: Practical & Efficient Solutions
- **Udemy**
 - The Ultimate Redux Course – Latest Redux-Toolkit
 - Accelerated ES6 JavaScript Training
 - Ultimate AWS Certified Cloud Practitioner (CLF-C02 2025)
